## Double wall pipes

- Gas and Fuel applications

High safety - high pressure pipes

Uwira is specialized in manufacturing of high demanding pipes and piping systems. Uwira's double wall pipes are a special product made for demanding applications where the environment is to be protected against possible leaks. The double wall pipes carry sensors on the outer pipe to ensure that leaks are detected on time and that the environment and personnel are safe. Double wall pipes can also be bent to the customer's needs and requirements. We work closely with classification societies in the manufacturing of the double wall pipes.

Examples of customer applications:

1. inner pipe DN 200 and outer pipe DN 250
2. inner pipe DN 80 and outer pipe DN 125
3. inner pipe 17,15 mm and outer pipe 26,67 mm
4. inner pipe 25 mm and outer pipe 38 mm

Bent double wall pipes are manufactured according to customers' needs with pressures up to 2000 bars.
