

Uwira

Reliability and cost-efficiency | Solutions with dimensional accuracy

Products

Uwira

Uwira is a specialist in welded metal products and components. Our product range includes steel piping solutions for industrial machines and equipment, containers and pressure vessels, as well as machining. Based on our wide range of hardware and versatile competence, we offer customer and project-specific solutions.

Uwira was founded in 1993 and, together with our subsidiary Kilkanen, it is a part of the Leinolat Group, which comprises six companies. A significant amount of diverse knowledge from the metal industry is concentrated around one of the world's most important energy clusters in the Leinolat Group in Vaasa, Finland.

“Uwira - accurate solutions
for accurate needs”

Reliability and cost-efficiency | Solutions with dimensional accuracy

Products

Reliability and cost-efficiency

Uwira's solutions are developed for demanding conditions. Our piping and machining solutions are used by, among others, the leading manufacturers of ship and power plant motors, because their products require reliability and life-cycle thinking.

We constantly develop our products together with our customers, which helps us to ensure their quality and competitiveness.

Solutions with dimensional accuracy

We offer part assemblies and prefabricated products which are tailored to the needs of our customers. Special know-how in welding, machining and cold bending of steel pipes enables dimensionally accurate entities.

Our product portfolio includes steel pipe solutions, containers and pressure vessels, as well as machined parts. In addition, we offer assembly, machining, testing, and installation services according to requirements.

Assemblies

We produce whole units or part assemblies for customer machines or equipment for different purposes. The units or part assemblies may include pumping units, filter units or pressure air units. When delivered, the units are ready for installation.

Turnkey solutions for industrial pipes

Uwira offers its customers also comprehensive turnkey solutions. Our project service covers planning, prefabrication, installation and commissioning.
